

# THE WORLD CONGRESS OF CLINICAL LIPIDOLOGY

6-8 DECEMBER, 2012 | BUDAPEST, HUNGARY

Join us at the first **World Congress of Clinical Lipidology**, to be held in the culturally rich and ancient capital of Budapest from December 6<sup>th</sup>-8<sup>th</sup> 2012. Together we will not only investigate the latest recommendations for lifestyle, diet and lipid lowering compounds, but also discuss novel therapies in the fight to prevent, rather than simply contain, the world's most rampant killer: heart disease.

Be part of this groundbreaking congress exploring all aspects of lipidology, from diagnosis to diet and treatment. Lipidology is a fast expanding field indispensable in the prevention of stroke and heart disease, which are the leading causes of premature death worldwide. Yet lipid disorders are amongst the most prominent, treatable risk factors for cardiovascular diseases.

Come and participate in the prevention of life-threatening lipid-related disorders, not just in prescribing a cure!
